

## SmartCare CRM — Phase 2: Org Setup & Configuration

### 1. Introduction

This phase covers setting up a Salesforce Developer Org to simulate a healthcare environment for patient management, appointment booking, doctor scheduling, and prescription tracking.

### 2. Objectives

- Configure a Salesforce Developer Org named “SmartCare CRM.”
- Create sample users (Hospital Admin, Doctor, Receptionist).
- Secure sensitive patient data using OWD and sharing rules.
- Demonstrate Appointment booking, Doctor assignment, and role-based visibility.

### 3. Configuration Steps

#### Step 0 — Company Info

- Signed up for Developer Edition and logged in.
- Setup → Company Information → updated Organization Name = SmartCare CRM, Locale = English (India), Timezone = IST.

The screenshot shows the 'Company Information' page in the Salesforce Setup interface. The page title is 'Company Information' with a 'SETUP' icon. Below the title, it says 'SmartCare CRM' and 'The organization's profile is below.' There are links for 'User Licenses (10)', 'Permission Set Licenses (10)', 'Feature Licenses (11)', and 'Usage-based Entitlements (10)'. The 'Organization Detail' section is expanded, showing a table of organization settings. The table has two columns: 'Organization Detail' and 'Edit'. The settings include Organization Name, Primary Contact, Division, Address, Fiscal Year Starts In, Activate Multiple Currencies, Enable Data Translation, Newsletter, Admin Newsletter, Hide Notices About System Maintenance, Hide Notices About System Downtime, Locale Formats, Phone, Fax, Default Locale, Default Language, Default Time Zone, Currency Locale, Used Data Space, Used File Space, API Requests, Last 24 Hours, Streaming API Events, Last 24 Hours, Restricted Logins, Current Month, Salesforce.com Organization ID, Organization Edition, and Instance.

| Organization Detail                   | Edit                                           |
|---------------------------------------|------------------------------------------------|
| Organization Name                     | SmartCare CRM                                  |
| Primary Contact                       | OrgFarm EPIC                                   |
| Division                              |                                                |
| Address                               | India                                          |
| Fiscal Year Starts In                 | January                                        |
| Activate Multiple Currencies          | <input type="checkbox"/>                       |
| Enable Data Translation               | <input type="checkbox"/>                       |
| Newsletter                            | <input checked="" type="checkbox"/>            |
| Admin Newsletter                      | <input checked="" type="checkbox"/>            |
| Hide Notices About System Maintenance | <input type="checkbox"/>                       |
| Hide Notices About System Downtime    | <input type="checkbox"/>                       |
| Locale Formats                        | ICU                                            |
| Phone                                 |                                                |
| Fax                                   |                                                |
| Default Locale                        | English (India)                                |
| Default Language                      | English                                        |
| Default Time Zone                     | (GMT+05:30) India Standard Time (Asia/Kolkata) |
| Currency Locale                       | English (United States) - USD                  |
| Used Data Space                       | 396 KB (8%) <a href="#">View</a>               |
| Used File Space                       | 421 KB (2%) <a href="#">View</a>               |
| API Requests, Last 24 Hours           | 0 (15,000 max)                                 |
| Streaming API Events, Last 24 Hours   | 0 (10,000 max)                                 |
| Restricted Logins, Current Month      | 0 (0 max)                                      |
| Salesforce.com Organization ID        | 00DgK000007a1eH                                |
| Organization Edition                  | Developer Edition                              |
| Instance                              | CAN96                                          |

#### Business Hours & Holidays

- Created “Hospital Business Hours”.
- Added relevant Holidays and linked them to Hospital Business Hours.

[Holidays \(2\)](#)

**Business Hours Detail**
Edit

| Business Hours Name | Hospital Business Hours                                                                                                                                                                                                                                                                                                                   | Time Zone              | (GMT+05:30) India Standard Time (Asia/Kolkata) |
|---------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|------------------------------------------------|

Edit

**Holidays**
Add/Remove

| Holiday Name                     | Description | Date and Time                       |
|----------------------------------|-------------|-------------------------------------|
| <a href="#">Independence Day</a> |             | 8/15/2026 All Day <a href="#">🔗</a> |
| <a href="#">Republic Day</a>     |             | 1/26/2026 All Day <a href="#">🔗</a> |

## Users

- Created 3 sample users:

Hospital Admin | admin@smartcare.com | System Administrator | Hospital Admin

Dr. Anjali Rao | anjali.rao@smartcare.com | Doctor | Doctor

Receptionist Riya | riya.receptionist@smartcare.com | Receptionist | Receptionist

## Profiles

- Cloned Standard User → created Doctor profile.
- Cloned Standard User → created Receptionist profile.
- Adjusted Object Permissions:
  - o Patient\_\_c: Doctor = Read/Edit/Create/Delete, Receptionist = Read/Create/Edit
  - o Appointment\_\_c: Doctor = Read/Create/Edit, Receptionist = Read/Create/Edit
  - o Prescription\_\_c: Doctor = Full Access, Receptionist = Read only

## Role Hierarchy

- Created simple hierarchy:

Hospital Admin (top)

- Doctor
- Receptionist

## Your Organization's Role Hierarchy

[Collapse All](#) [Expand All](#)

## Org-Wide Defaults (OWD)

- Setup → Sharing Settings.
- Patient\_c = Private.
- Appointment\_c = Private.
- Prescription\_c = Controlled by Parent.

|              |                      |                      |   |
|--------------|----------------------|----------------------|---|
| Appointment  | Private              | Private              | ✓ |
| Doctor       | Public Read/Write    | Private              | ✓ |
| Mentor       | Private              | Private              | ✓ |
| Order Detail | Public Read/Write    | Private              | ✓ |
| Patient      | Private              | Private              | ✓ |
| Prescription | Controlled by Parent | Controlled by Parent |   |

## Sharing Rule (Receptionist ↔ Doctor access)

- Created Public Group “Doctors” containing all doctor users.
- Created Owner-based sharing rule:
  - o Owned by: Receptionist
  - o Share with: Doctors group
  - o Access Level: Read/Write

Group

Doctors

## Login Access Policy

- Enabled “Administrators Can Log in as Any User.”

## SmartCare Lightning App

- Setup → App Manager → New Lightning App “SmartCare Hospital.”
- Added tabs: Patients, Appointments, Doctors, Prescriptions, Reports, Dashboards.

## Testing

- Logged in as Receptionist → created an Appointment assigning Dr. Anjali.
- Logged in as Dr. Anjali (using Login-As) → verified she can view & edit the Appointment.
- Verified OWD & sharing restrict unauthorized access.

## 4. Results / Observations

- Receptionist can create Appointments and assign them to Doctors.
- Doctor automatically gains Read/Write to Appointments via sharing rule.
- Hospital Admin sees everything.
- OWD set to Private ensures sensitive patient data is secure.
